Wyoming	563,626	0.796	1	1	1	1	1	1	1	1
Total	308,143,815	435	50	435	435	435	435	435	435	435

Webster was a slight outlier in 2010, as it was in some prior decades. It would have rounded NC up and RI down, despite a slightly larger fractional part for RI. The other three methods, including Hill, agreed on seat allocations.

NOTES
 Solutions via Excel Solver (Data/Solver), starting with an initial divisor of 800,000 in each case.
 Hill (geometric mean, aka "equal proportions") is the official method run by the Census Bureau.
 Of the four main contenders, only Webster differed in 2010.
